WBS #	Task Name	Duration	Predecessors	January				February				March					April				May	
				4	11	18	25	1	8	15	22	1	8	15	22	29	5	12	19	26	3	10
1	Write Reporting Application																					
1.1	Design User Website																					
1.2	Insert Results Viewing Table		1.1																			
1.3	Insert SQL Query Field		1.1																			
1.4	Insert Subscription Field		1.1																			
2	Write I.S. Management App																					
2.1	Duplicate code for Reporting App		1																			
2.2	Add Management Tools		2.1																			
2.2.1	Insert "Connect Client" field		2.1																			
2.2.2	Insert "Add User" field		2.1																			
2.2.3	Insert "Delete User" field		2.1																			
2.2.4	Insert "Create Security Profile" field		2.1																			
2.2.5	Insert "Change User Privileges" field		2.1																			
3	Create Security Database																					
3.1	Create empty tables based on schema																					
3.2	Link security database to reporting application																					
3.2.1	Link Results Viewing Table to security database		1.2																			
3.2.2	Link SQL Query Field to security database		1.3																			
3.2.3	Link Subscription Field to security database		1.4																			
4	Implement Authentication		1, 2, 3																			
4.1	Create a login page																					
4.1.1	Synchronize login page with security database		3																			
4.1.2	Attach reporting app to login page		1																			
4.1.3	Attach I.S. management app to login page		2																			
5	Create information database																					
5.1.	Create empty tables for information storage																					
6	Create Mining Agent (if time permits)																					
7	Perform Data Mining (if time permits)		6
