Course Number | CS 534 | Course Title | Big Data Management and Analytics
---|---|---|---
Semester Hours | 3 | Course Coordinator | Xiaolan Huang

Catalog Description
This course provides comprehensive and in-depth discussions of big data management and analytics. Main subjects include computation and programming models, management and analytics algorithms, and platforms/frameworks especially designed for big data. The objective of this course is to equip students with the ability to understand, use, and build big data management and analytics systems or tools.

Course Learning Outcomes
- Understanding the key features and issues of Big Data.
- To learn the important approaches to Big Data management.
- To learn the computation models and frameworks of Big Data.
- To study the data mining methods designed/customized for Big Data.

</table>

- Course Introduction {1 lecture}
- Introduction to Big Data {2 lectures}
- Big Data Collection {2 lectures}
- Big Data Storage Systems {5 lectures}
- Big Data Computation Models {5 lectures}
- Big Data Management {5 lectures}
- Big Data Mining {5 lectures}
- Learning Insights from Big Data {5 lectures}
- Big Data Visualization {5 lectures}
- Crowdsourcing {5 lectures}

**Total hours**: 40 lecture hours plus extra seminar hours.
