

<b>Course Number</b>	<b>CS 435</b>	<b>Course Title</b>	<b>Software Engineering</b>			
<b>Semester Hours</b>	<b>3</b>	<b>Course Coordinator</b> SP20	<b>Koushik Sinha</b>			
<b>Catalog Description</b>	Principles, practices and methodology for development of large software systems. Object-oriented principles, design notations, design patterns and coping with changing requirements in the software process. Experiences with modern development tools and methodologies. A team project is an integral part of this course.					
<b>Textbooks</b>						
SP18						
Pressman, R.S. & Maxim, B.R. (2020). <i>Software Engineering: A Practitioner's Approach</i> , McGraw Hill, 6 <sup>th</sup> Edition. ISBN: 978-1259872976.						
<b>References</b>						
Various references to tool and language documentation, resources on patterns, principles, etc.						
<b>Course Learning Outcomes</b>						
<ul style="list-style-type: none"> <li>• To understand and develop experience working within a collaborative team environment.</li> <li>• To become familiar with concepts of software development methodologies and notations.</li> <li>• To be able to apply modern development tools and practices to create software both individually and collaboratively.</li> <li>• To understand basic principles of Object Oriented design and the value of software patterns.</li> </ul>						
<b>Assessment of the Contribution to Student Outcomes</b>						
SP20						
<b>Outcome →</b>	1	2	3	4	5	6
<b>Assessed →</b>	X	X	X		X	X
<b>Prerequisites by Topic</b>						
CS 330 with a grade of C or better or graduate standing; CS 306 with a grade of C or better recommended.						

**Major Topics Covered in the Course**

1. Introduction to software development {2 classes}
2. Perspectives on software process {3 classes}
3. Introduction to software best practices {3 classes}
4. Communication, collaboration and teamwork {6 classes}
5. Software development tools & environment IDE, testing framework, build scripts {3 classes}
6. Coding style and conventions {2 classes}
7. Object oriented principles {5 classes}
8. Practices and process in depth {6 classes}
9. Design notations {3 classes}
10. Software design patterns {5 classes}
11. Anti-patterns {2 classes}
